

## Light/Dark Chamber Test

### DESCRIPTION

The Light/Dark Chamber test is available for the measurement of anxious behavior in mice. Animals are placed in the apparatus and are motivated by their natural exploratory behavior. The time spent in each section of the chamber is recorded. The Animal Phenotyping Core houses two of these units.

### FEATURES & SPECIFICATIONS

**Two chambered light/dark box with removable top**

**Coupled with Any-Maze behavioral tracking software for objective data collection and analysis**
